PRE-WIRED 3MM LED

ASR00030-R Color Red
ASR00030-G Color Green
ASR00030-B Color Blue

DESCRIPTION

This is one of the easiest ways to add some color to your TinyDuino project. These crystal clear 3mm LEDs are already wired with a built in current limiting resistor, so all you need to do is solder the pre-tinned wires to a power source.

TECHNICAL DETAILS

LED Diameter: 3mm

Wire Length: 20mm

Resistor Value: 510 Ohms

Operating Voltage: 3-12V

Current Draw: 10-30mA (Depending on color and supply voltage)
