| 29    | Vibration  | -                |             | At no operating, 10 - 55Hz (Sweep for 1min)<br>19.6m/s² Constant, X,Y,Z 1hour each.                     |                |                 |                 |                 |                 |
| 30    | Shock  | -                |             | Less than 196.1m/s²   |                |                 |                 |                 |                 |
| 31    | Safety   | -                |             | Approved by UL60950-1, CSA60950-1, EN60950-1, EN50178(OV II),<br>Designed to meet DENAN at 100VAC Only. |                |                 |                 |                 |                 |
| 32    | Conducted Emission                               | -                |             | Designed to meet EN55011/EN55022-B, FCC-B, VCCI-B   |                |                 |                 |                 |                 |
| 33    | Radiated Emission                                | -                |             | Designed to meet EN55011/EN55022-B, FCC-B, VCCI-B   |                |                 |                 |                 |                 |
| 34    | Immunity   | -                |             | Designed to meet IEC61000-6-2 IEC61000-4-2, -3, -4, -5, -6, -8, -11                                     |                |                 |                 |                 |                 |
| 35    | Weight (Typ.)                                    | g                |             | 230   |                |                 |                 |                 |                 |
| 36    | Size (W x H x D)                                 | mm               |             | 50 x 33 x 150 ( Refer to Outline Drawing )  |                |                 |                 |                 |                 |

\*Read instruction manual carefully, before using the power supply unit.

=NOTES=

\*1. At 100VAC/200VAC, Ta=25°C, nominal output voltage and maximum output power.

\*2. For cases where conformance to various safety specs (UL, CSA, EN) are required, to be described as 100 - 240VAC(50/60Hz).

\*3. Not applicable for insush current to a noise filter for less than 0.2ms.

\*4. Please refer to Fig. A for measurement of output voltage, line &amp; load regulation and ripple voltage.

\*5. 85 - 265VAC, constant load.

\*6. No load-Full load, constant input voltage.

\*7. Hiccup with automatic recovery.

Avoid to operate at over load or short circuit condition for more than 30seconds.

\*8. OVP circuit shut down the output, manual reset (Re power on) to get output voltage.

\*9. Measured by the each measuring method of UL, CSA, EN and DENAN(at 60Hz), Ta=25°C.

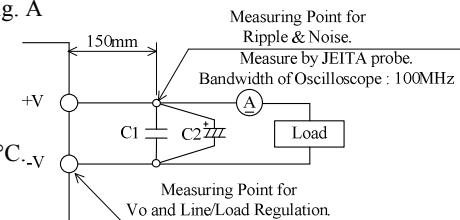

\*10. Output Derating

- Derating at standard mounting. Refer to output derating curve(A248-01-02\_ ).

- About a force air cooling, refer to output derating curve (A248-01-03\_ ).

- Load (%) is percent of maximum output power or maximum output current, whichever is greater.
